

Article Overview

Top Australian manufacturers for large-span cable trays include EzyStrut, Ozstrut, Burndy CSS, Axelent, Brilltech, and ACURA Group, offering durable, high-capacity solutions for industrial and commercial projects.

Leading Manufacturers

EzyStrut is a market leader in Australia, providing a wide range of cable trays including ladder trays, solid-bottom trays, and wire mesh trays. Their products are designed for heavy-duty applications in sectors such as mining, telecommunications, and construction. EzyStrut trays are made from pre-galvanised or hot-dip galvanised steel, and aluminium options are also available. They offer customization for high-volume or high-load projects and comply with Australian standards such as AS4680:2006 for galvanised steel. Ozstrut supplies perforated, T3, and T5 cable trays. The T3 trays are standard for industrial and commercial use, supporting higher cable loads and fire-rated systems, while T5 trays are the heaviest-duty option, suitable for maximum cable laying depth. Ozstrut emphasizes fast installation, compliance with Australian standards, and reliable support for electrical wiring. Burndy CSS, Axelent, and Brilltech are also recognized for producing robust cable management systems capable of withstanding harsh industrial environments. These manufacturers provide solutions tailored to specific project requirements, including large-span and high-load applications. ACURA Group, based in Adelaide and Perth, offers cable trays, ladders, and mesh baskets for commercial and industrial construction. They focus on providing complete cable support systems with local expertise and support for large-scale projects.

Key Considerations

- o **Material and Load Capacity:** Steel (pre-galvanised or hot-dip) and aluminium options are available for heavy-duty and outdoor applications.
- o **Customization:** Many manufacturers offer bespoke solutions for unusual installations or high-volume cable runs.
- o **Compliance:** All leading Australian manufacturers adhere to local standards, ensuring safety and durability.
- o **Local Support:** Choosing a local supplier ensures access to technical support, installation guidance, and timely delivery. For large-span cable tray projects in Australia, selecting a manufacturer like EzyStrut, Ozstrut, or ACURA Group ensures high-quality, compliant, and durable solutions tailored to industrial and commercial needs.
