

Article Overview

Active Optical Cables (AOCs) for SFP+ are available in Canada from multiple retailers, supporting high-speed 10Gbps connections with lengths ranging from 3 meters to 10 meters.

Overview

Active Optical Cables (AOCs) are fiber-optic SFP+ cables designed for high-speed, low-latency connections between network devices such as switches, routers, and servers. Unlike copper Direct Attach Cables (DACs), AOCs use optical technology to extend reach beyond 5 meters while maintaining error-free performance and minimal electromagnetic interference (EMI) .

Key Features

- o Speeds: Typically 10Gbps, suitable for Ethernet, Fiber Channel, and HPC interconnects .
- o Lengths: Common lengths include 3 meters (9.8 ft) and 10 meters, with other lengths available depending on the retailer .
- o Compatibility: Many AOCs are Cisco-compatible and adhere to SFP+ Multi-Source Agreement (MSA) and SFF-8431 standards, allowing use with non-proprietary 10Gb networking equipment .
- o Design: Ultra-thin, lightweight construction reduces port strain and improves airflow in high-density racks .
- o Integration: Hot-swappable, all-in-one design eliminates the need for separate transceivers, reducing latency and connection points .
- o Interference Resistance: Fiber-optic construction ensures minimal EMI/RFI, enhancing signal integrity .

Canadian Retailers

- o StarTech.com Canada - Offers both active and passive SFP+ cables, including active optical options for short- and medium-range connections within racks .
- o Black Box Canada - Sells Cisco-compatible 10Gbps SFP+ AOCs in various lengths, tested and serialized for guaranteed performance .
- o Best Buy Canada - Provides 3-meter 10Gb SFP+ Active Optical Cables, with shipping and availability details for Canadian addresses .
- o Amazon.ca - Lists multiple SFP fiber cable options, though stock may be limited; check individual product pages for availability .
- o SFPMaster Canada - Specializes in LC to LC fiber cables and offers fast shipping from Toronto, suitable for Canadian buyers .

Recommendations

- o For Cisco environments: Choose Cisco-compatible AOCs from Black Box or StarTech.com to ensure

Canadian Retail Active Optical Cable SFP

seamless integration.

- o For high-density racks: Opt for ultra-thin, lightweight AOCs to reduce port strain and improve airflow.
- o For longer distances: Active optical cables are preferred over copper DACs for distances beyond 5 meters.
- o Check stock and shipping: Availability may vary by province; Best Buy and Amazon provide real-time stock updates for Canadian locations. These options provide reliable, high-speed connectivity for Canadian networking setups, whether for enterprise, data center, or HPC applications.
