

# Do network server racks have lighting functions

## Preview

Rack-integrated lighting systems refer to luminaires specifically mounted on or inside data racks, designed to provide direct illumination for equipment access, maintenance, and cable management. Unlike overhead lighting, rack lighting addresses blind spots inside enclosures and ensures technicians. We at PacLights understand that proper rack lighting transforms server room operations. Server rooms demand precise lighting calculations that general facility lighting cannot meet. One of the fun and cool things you can do with a home server rack is add lighting.

This server rack buying guide will help you understand what a server rack is and key factors for your data center environment or IT closet.

Rack-integrated lighting systems refer to luminaires specifically mounted on or inside data racks, designed to provide direct illumination for equipment access, maintenance, and cable
