

Double row distribution box

Preview

Galvanized double-row distribution boxes are components of mechanical ventilation systems, designed for air distribution in residential buildings. Made of INOX stainless steel, they are equipped with 14 or 16 Ø75 mm connectors arranged in two rows. The Ø198 mm main spigot can be positioned on the back, side, or top of the box. This extension box has thirty-four 18mm modules over two horizontal rows and is made from a steel material. They play a pivotal role in ensuring the reliable flow of power, serving as the backbone of electrical systems in. All Elucian(R) Metal Dual Row Consumer Units will come supplied furnished with a 100A Mains Switch, 2 Pole 275Vc (V~) 40kA Type 2 SPD & 100A Connector linking both tiers together. The whole plastic cover made from high quality PC, UV protection cover, flexible and strong enough that never break and never fade, the surface of cover is sanded.
