

Heat shrink tubing for cables and pigtails

Preview

Heat shrink tubing is used on wiring assemblies, splices, terminals, connectors and to moisture proof electrical parts. Heat shrink tubing provides electrical insulation, mechanical protection, environmental sealing, and strain relief. Available in single wall tubing and dual wall tubing, our heat shrinkable tubing is engineered for use in numerous applications, including back-end connector sealing, breakouts, and. Heat shrink tubing with special properties such as PTFE heat shrink tubing, Viton(R) heat shrink tubing or Kynar(R) heat shrink tubing can also be found in our online store. Special plastic hoses, known as heat shrink hoses, contract considerably when exposed to heat, thus protecting the products enclosed from mechanical damage or. 3M Heat Shrink is a trusted technology to reliably insulate and protect your important applications.

Available in single wall tubing and dual wall tubing, our heat shrinkable tubing is engineered for use in numerous applications, including back-end connector sealing, breakouts, and connector-to-cable

Fans, Cooling and Heating Systems Power Sources Mechanical components Enclosures Automation Pneumatics and Hydraulics Workplace Equipment Office Equipment Car Audio Computer

In our product portfolio you will find on the one hand flexible Heat shrinkable tubing which constrict under the influence of heat to form a tight, protective sheath around the cable or connection.

With a heat shrink tubing and a heat gun and special reflector nozzle from Leister or Weldy, cables can be insulated in no time at all. Leister not only offers the right hot air devices, but also special nozzles

Polyolefin, 2.5:1 Shrink Ratio, 2200 PSI Tensile Strength, MW TubingsMW encapsulates and seals in one step in the same way as EPS-200. Semi-rigid outer wall gives superior abrasion and cut-through

heat shrink tubing is a type of plastic tubing that shrinks when heated, hence the name "heat shrink." It is commonly used for electrical insulation, protection, and bundling of wires, cables, and other

Heat shrink tubing is used on wiring assemblies, splices, terminals, connectors and to moisture proof electrical parts. The product has excellent properties of insulation, abrasion resistance and

Dual wall polyolefin shrink tubing with an adhesive liner is also available for applications that require superior strain relief and environmental sealing. Heat shrink tubing from Molex is ideal for protecting,

Cold-Shrink Tubing Conforms to wire and cable without heat, creating a permanent, watertight seal

Heat shrink tubing for cables and pigtails

At BuyHeatShrink.com, we specialize in heat shrinkable tubing, shrink wrap tubing, cable ties, expandable braided Sleeving, convoluted tubing and many other

Our range includes thin, medium, and thick-walled heat shrink tubes, special solutions for specific applications, as well as small quantities of heat shrink tubing, repair kits, and hot air blowers. Please

Heat shrink tubing is an essential solution for ensuring protection, insulation and durability of electrical cables and components in industrial environments. Due to its ability to retract when heated, it

3M Heat Shrink Tubing and Devices provide an easy solution for insulating and protecting wire, cables, connections and components. These field-proven products are known for ease of use and durability,

Heat Shrink Tubing Heat shrink tubing is commonly used for electrical insulation, protection, and for bundling wires, cables, and other components. The shrink tube provides an effective barrier against

Grommets and cable ties for additional strain relief and protective braided tubing for incoming cable are also included. Splicing cassettes ship with the appropriate quantity and type of

Minimum Qty: 1 Add TE Connectivity 5500982001 Heat Shrink Tubing, 1.333 yd length, Black, Polyolefin, 2:1 Ratio, Flexible TE Connectivity 5500982001 Heat Shrink Tubing, 1.333 yd length,
