

How to connect bare optical fiber heat shrink tubing

Preview

Position the heat shrink tubing by threading the cable in through the cylinder without force. Ensure the ends are covered as required before applying heat. Fiber splice fusion connection (hot melt) 2. This document identifies the different cable types, termination methods, and the Corning Optical Communications'. Single holed (preshrunk) ends eliminates improper fiber threading. Smooth, deburred stainless steel reinforcing member ends decrease the risk of fiber damage during installation. Extended liner length prevents contact between the fiber and their backbone. ? Level Up Your Fiber Skills - Join the One Up Techs Skool ? <https://www.>

Insert the prepared end of the fiber into the hole, secure it in place with a plastic adhesive and let it dry. Insert what
