

How to solve the red light issue on the router's fiber optic cable

Preview

If there is a red light in the second slot, noted by the "" symbol or "Optical", this could mean there is a fiber issue. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. That blinking red LOS light means your router has lost its connection to your internet provider's network. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. Fortunately, diagnosing and resolving these issues doesn't have to be complicated. In this comprehensive guide, we will walk you. This guide will provide you with step-by-step troubleshooting tips to identify and potentially resolve common fiber internet issues. Check your ONT (can also be called a Modem).
