S7712 Switch is widely used in campus networks and data center core/aggregation nodes to provide advanced control over wireless, voice, video, and data convergence networks, helping enterprises to build end-to-end converged networks with integrated switch routing. The S7712 chassis is 15 U high (1 U = 44. S7712 Switch is a new generation. S7712 Smart Routing Switch is a 12 slot high-end intelligent routing switch of Huawei S7700 series, which adopts distributed hardware forwarding and left rear air duct cooling architecture. Agile features supported in V200R005C00 and later versions 3. Innovative Cluster Switching System (CSS) 4. The price includes only the 1 x integrated chassis, and all additional components, such as main control boards, service modules, power supplies, and fan modules, must be purchased.

The S7712 switches are high-end smart routing switches designed for next

S7712 Smart Routing Switch is a 12 slot high-end intelligent routing switch of Huawei S7700 series, which adopts distributed hardware forwarding and left rear air duct cooling architecture.

The S7712 switches are high-end smart routing switches designed for next-generation enterprise networks. 1. Agile features supported in V200R005C00 and later versions. 3. Innovative Cluster
