That's the port where a cable will attach to carry data from the fiber optic network to your device. The port on your modem or router should be located on the back or the side. Fiber Optic Patch Panel Explanation Fiber optic patch panels are mostly mounted in 19 inch relay racks, but also on freestanding rails, cabinets. Fiber optic patch panels are enclosures that act as a distribution hub for fiber cable. A bulk (multi-strand) fiber cable enters the patch panel and then each fiber strand is separated into individual strands or pairs of strands. These individual strands will then connect to electronic devices. Gather the necessary tools, including a 1U rackmount fiber enclosure, a 48-port LC fiber patch panel, and screws. This smart design and professional engineering provides easy installation and maintenance.
