

Price of a 6-meter cable tray

Article Overview

The cost of a 6-meter cable tray ranges from approximately \$30 to \$300, depending on material and type.

Estimated Price by Material

- o Steel Cable Tray: \$5-\$25 per meter. For 6 meters, the total cost would be \$30-\$150. Steel is durable, cost-effective, and suitable for general indoor installations .
- o Aluminum Cable Tray: \$6-\$30 per meter. For 6 meters, the total cost would be \$36-\$180. Aluminum is lightweight, corrosion-resistant, and ideal for outdoor or humid environments .
- o Fiberglass Reinforced Plastic (FRP) Cable Tray: \$10-\$50 per meter. For 6 meters, the total cost would be \$60-\$300. FRP is highly resistant to chemicals, water, and UV, making it suitable for aggressive industrial environments .
- o Stainless Steel Cable Tray: Typically higher than aluminum, often exceeding \$30 per meter, making a 6-meter tray \$180+, ideal for high-demand or corrosive environments .

Additional Considerations

- o Tray Type: Ladder trays are generally more expensive than perforated or solid-bottom trays due to their load-bearing capacity .
- o Installation Accessories: Supports, brackets, and connectors can add to the total cost. Labor and shipping may also influence the final price .
- o Bulk Orders: Purchasing multiple trays or longer lengths may reduce the per-meter cost . For a 6-meter hot-dip galvanized steel ladder tray, using the standard per-meter range, you can expect a price around \$30-\$150, excluding installation and accessories . Choosing the right material and type depends on environmental conditions, load requirements, and budget, ensuring durability and safety for your electrical installation.
