FTTR Transparent Fiber Optic Cable is a type of indoor fiber cable designed for low-visibility fiber installation. Compared with traditional colored indoor fiber cable, an Invisible Fiber Optic Cable can significantly reduce visual impact after. As the name suggests, Invisible Fiber Cable is designed to be almost imperceptible, allowing for a clean, uncluttered appearance while delivering the same high-performance internet connectivity as traditional fiber optic cables. Unlike traditional fiber optic cables, which are usually covered with opaque PVC or LSZH. Mainly used as wiring cable in user access section of fiber to the home (FTTH) and other optical access (FTTx) network. By utilizing advanced technology, this innovative cable enables faster and more reliable data transmission, meeting the increasing demands of.
