

# Which button on the switch is the optical port mode button

## Preview

The port mode determines the type of information shown by the port LEDs. When you press the Mode button on any switch in the switch. The mode button on a Cisco 9300 switch is located on the front panel of the switch. It is typically a small, recessed button that can be pressed using a paperclip or similar small object. Table 1-5 lists the mode meanings. Each port has a port status LED, also called a port LED. Select "EDIFIER S1000W" in your device setting to.
